**Subject:** Microsoft Settlement

To Whom It may concern:

I am a software engineer at Hewlett Packard (my words may not represent official company position) for the past 16 years in Fort Collins, CO. I am a US citizen.

It is clear that a good attempt was made to address significant issues by the propose settlement with Microsoft.

What is equally as clear is that the settlement as written falls short of the mark at prevent MS from dancing around the letter of the settlement and still achieving the same results at they have pre-settlement. Likewise enforcement seems very weak and open to stalling tactics.

The rules are not rigorous enough and the authority/independence of the enforcement efforts is not powerful/empowered sufficiently.
